💼 Portfolio

EDUCATION

Masai School
Full Stack Development
March 2022 - March 2023

M.I.T.
Bachelor Of Engineering
June 2013 - June 2017

TECH SKILLS

HTML / CSS	Node Js
JavaScript	Express Js
React	Mongo DB
Redux	Chakra - UI
Design and Calculations	GIthub
Data Structure And Algorithm	

SOFT SKILLS

Problem-solving	Adaptability
Leadership	Teamwork

CERTIFICATES

Full Stack Development
Certification By Masai School

PROFESSIONAL SUMMARY

A dedicated full-stack web developer who is highly passionate about continuously learning new skills and problem-solving. Possess excellent leadership qualities and a team player, committed to developing scalable products that improve the quality of life for individuals.

WORK EXPERIENCE

DxMinds   *August 2023-Till Now*

Cozmo
- Backend development for "Cozmo" using NodeJs, Express, MongoDB Typescript, and more.
- Maintained strong MVC models and a well-structured backend for building models, schemas, validation, and authentication.
- Created all APIs for location, booking, and banner and performed testing.

Hallo Club
- Created secure authentication systems with CRM and custom APIs for improved platform security and usability.
- Integrated development tools and middleware like logger, and npm packages, enhancing project maintainability, and documentation.
- Conducted manual testing to ensure the functionalities of the project.

PROJECTS

E-commerce (FULL STACK) | GitHub | Deployed
Individual Project
Bewakoof is an e-commerce website that offers trendy and upbeat apparel designs.
Tech Stack: React | TypeScript | Nodejs | MongoDB | Redux | Express | ChakraUI
Features:
Front-end:
- Validation, Authentication, and Authorization.
- View Products as a guest, Search, Sorting, Filtering, and payment methods.
- Add-to-Cart | Add-to-Wishlist | Order-Details | Handle-Account | Address.
- Role-based access control (Admin, Users, Merchant).
- Admin-dashboard, and Merchant-dashboard where you can apply CRUD functionality and trace the order details, total revenue, date of purchase, etc.

Back-end:
- For role-based access, perform validation, authentication, and authorization..
- Use JWT tokens for token generation, Bcrypt for hashing passwords, Dotenv for storing secret keys and links.
- Follow the MVC pattern for backend structure and use MongoDB to store data

BEAUTY HOLIC (FULL STACK) | GitHub | Deployed
Collaborative Project
Beautyholic is India's fastest-growing online retail store for day-to-day and special occasion needs of Makeup, Skincare, and Hair care products.
Tech Stack: React | Nodejs | MongoDB | Redux | Express | ChakraUI | Mongoose
Features:
- Build the Product booking app from scratch till ordered.

Areas of responsibility:
- Validation, Authentication, and Authorization and following MVC pattern.
- JWT token for token creation, Bcrypt for hashing.
- MongoDB to store data and mongoose for the established connection.
- Dotenv for storing Secret-keys and links
- Established remote deployment using Render.
